DETAILED ACTION

1. Claims 1-13 are presented for examination.

Claim Rejections - 35 USC § 102 (e)

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 (e) that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

3. Claims 1-4, 9-12, are rejected under 35 U.S.C. 102 (e) as being anticipated by Giorgio (U.S. Pat. No. 5,761,085).

As per claims 1, 11, Giorgio discloses a method for retrieving or updating system status for a computer, comprising:

a first computer (see., fig 1);

Art Unit: 2785

a microcontroller capable of providing a retrieve or update system status signal to the first computer (see., figs 1 and 2, col 4, lines 13-26, col 6, lines 7-25);

a remote interface connected to the microcontroller (see., fig 2, element 64, col 5, lines 64-67); and

a second computer connected to the first computer via the remote interface and communicating a retrieve or update system status command to the microcontroller (see., figs 1 and 2, col 5, lines 64-67, col 6, lines 1-6, col 7, lines 12-26, lines 50-67, col 8, lines 1-67).

As per claim 2, Giorgio discloses the claimed limitation wherein the remote interface includes an external port for connection to the second computer (see., figs 2 and 3, col 7, lines 5-11).

As per claims 3, 4, Giorgio discloses the claimed limitation wherein the second computer is at the same location as the first computer (see., figs 1 and 2).

As per claim 9, Giorgio discloses the limitation wherein the remote interface includes a remote interface microcontroller that connects via a bus to the microcontroller (see., fig 2).

As per claim 10, Giorgio discloses the claimed limitation wherein the remote interface in is responsive to a command sent from the second computer to retrieve or update system status from the microcontroller (see., figs 1 and 2, col 7, lines 12-26, lines 50-67, col 8, lines 1-67).

Art Unit: 2785

As per claim 13, Giorgio discloses the claimed limitation wherein the remote interface includes a power source independent of a power source for the first computer (see., fig 2, col 4, lines 27-63).

Claim Rejections - 35 USC § 103 (a)

4. The following is a quotation of 35 U.S.C. 103 (a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 5-8, are rejected under 35 U.S.C. 103 (a) as being unpatentable over Giorgio (U.S. Pat. No. 5,761,085).

As per claims 5, 6, 8, Giorgio substantially discloses the claimed limitation (see., fig 2, col 4, lines 7-12), but he fails to specifically disclosed a second modem that connects to the second computer and a satellite. However, Examiner hereby takes Official Notice That modem is notoriously well known in the art and therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to include a modem to the computer method of Giorgio, because it is a communications device that enables a computer to transmit information over a standard telephone line and a communications satellite is a communications that can be used for high speed transmission of computer data and also capable of handling immense volumes of information.

Art Unit: 2785

As per claim 7, Giorgio the claimed limitation wherein each modem further connects to a cable network (or LAN) see., fig 2, element 64.

CONCLUSION

6. The prior art made of record and not relied upon is considered to applicant's disclosure.
